

Assignment 4 and 5

Section I. Data Documentation

Find the data documentation for our user table in **docs/user_table_erd.png**

The screenshot shows a database schema viewer with two tables. The first table, 'users', has columns: 'id' (integer, primary key), 'fb_name' (text), 'fb_email' (text), 'fb_oauth_token' (text), 'fb_app_token' (text), and 'num_uses' (integer). The second table, 'sqlite_sequence', has columns: 'name' (text) and 'seq' (text). The text 'Powered by yFiles' is visible at the bottom.

Table	Column	Type
users	id	integer
	fb_name	text
	fb_email	text
	fb_oauth_token	text
	fb_app_token	text
	num_uses	integer
sqlite_sequence	name	text
	seq	text

We have one table called users.

Table Schema

```
CREATE TABLE IF NOT EXISTS "" +  
TABLE_NAME_USERS + ""  
(  
    id INTEGER PRIMARY KEY  
    AUTOINCREMENT,  
    fb_name VARCHAR(255) NOT NULL,  
    fb_email VARCHAR(255) NOT NULL  
    UNIQUE,  
    fb_oauth_token VARCHAR(255) NOT NULL  
    UNIQUE,  
    fb_app_token VARCHAR(255),  
    num_uses INTEGER NOT NULL DEFAULT 0  
);
```

Section II: Test Plan and Execution

See **docs/Testing_and_Quality.xlsx**
